

Yanun is a 100% Indigenous owned and operated Project Services Company specialising in the delivery of **on time and on budget complex projects and programs within the Defence and Government Sectors.**

Managing Director David Mallett, a proud Ngarrindjeri man from Adelaide's South East, understands and respects Defence's operational needs having spent 8 years in the Australian Special Forces serving as a Navy Clearance Diver and Special Operations Sniper. Our staff hold the appropriate defence security clearances; we deliver services on some of Australia's largest defence programs including representing the Commonwealth on the SEA 1000 Future Submarine Program.

Core Competencies

Yanun delivers project excellence by being authentic, transparent and responsive through meaningful interactions and the development of high-quality deliverables.

Program & Project Management

With a practical and outcome focused approach, our program and project management services deliver results by thinking and acting broadly, logically and strategically. Because every project is different, stakeholder input is imperative to understand the unique set of priorities and parameters. We ask, listen, challenge and confirm. Communication underpins every aspect of our delivery, including structured and practical interactions such as workshops, plans, schedules and reports. We take our role seriously, are never just a mailbox, and challenge, think and care. Your project is our project.

Project Schedule Management

Yanun provide high quality project planning and schedule support for the delivery of infrastructure and operational needs. Our schedules are robust, polished and considered. Stakeholder input is imperative to a high-quality deliverable and to ensure that all needs and requirements are met. Our schedules are produced with a level of composition and detail appropriate for the project and the reader and these are regularly updated to reflect project and program progress. They assist teams to understand critical interfaces, required resources and provide early identification of issues to allow effective corrective actions.

Major projects

SEA 1000 Future Submarine Program

Cultana Training Area Redevelopment, Air7000 Phase 1B Multi-mission Unmanned Aerial System (MUAS) Sustainment Facilities Project, AEGIS Training Transition and Torrens Rail Junction Alliance

In parallel to Yanun's commitment to excellence in project planning and delivery, Yanun has a fierce desire to improve the lives of Indigenous Australians. Just as the saying goes 'Give a man a fish and you feed him for a day; teach a man to fish and you feed him for a lifetime',

Yanun believes that economic independence is a core requirement of a brighter future for Australia's first people.

Yanun is dedicated to mentoring, training and providing opportunities for younger Aboriginal people to develop their own lifelong skill sets and in doing so, build Aboriginal empowerment, one success story at a time.

Specialist Services

'Our commitment to our clients and to the communities in which we operate are recognised as our core values of Respect, Integrity & Trust'

Project Controls

Successful projects begin with proper planning. A project management plan should be supported by project control processes that monitor work and identify whether the work is proceeding to plan. Project complexity, organisation maturity, team expertise and project budget are some of the factors which determine the level of control needed. Too much control can cause project costs to rise and divert skilled resources from more important tasks. Too little control can result in delays, errors and lower than expected project outcomes.
